# TABLE OF CONTENS

## Volume I:

### PRODUCTION TECHNOLOGIES AND OPERATION

#### Presmelting Operations

Agglomeration of refractory chromite ore  
*A.A. Akberdin, A.S. Kim, R.A. Akberdin*  

Methods of manganese ore thermal-treatment prior to smelting — what to choose?  
*Y. Gordon, J. Neil*  

Technical development of ferrosilicon manganese production in ore-smelting electric furnaces with using of manganese magnesia agglomerate  

Use of RADOS XRF sorters: experience at TATA STEEL  
*S. Mohanan, G. Saxena, R. K. Chittapragada, M. Naik, K. Ashok*  

#### Chromium Alloys Production and Operation

Aspects of DC chromite smelting at MINTEK — an overview (PLENARY)  
*L. L. Geldenhuyys*  

Production of low-carbon ferrochrome with the low content of phosphorus using the complex reducer  
*E.N. Akimov, Y.I. Voronov, A.V. Senin, V.E. Roshchin*  

New process for sintering chromite concentrate with continuous-strand sinter machine  
*H. Wang, X. Wang, Y. Lang, S. Chu*  

Granulation of ferroalloys – results from industrial operations and comparative study on fines generation  
*P. Vesterberg, K. Beskow, C-J Rick*  

Cliffs chromite — a North American integrated producer  
*M. H. Cramer*  

Ferrochrome production in Albania  
*H. Mueller, A. Vangieli, R. Lurf, C. Redi*  

Physicochemical features of chromite elements reduction kinetics in ferro-alloy electric furnaces  
*O.V. Zayakin, V. I. Zhuchkov, V.I. Afanasiev, A.V. Dolmatov*  

Ferrosilicon chrome production technology/practices’ effect on the quality of low carbon ferrochrome  
*J. Chirasha*
A process for the recovery of chromium and iron oxide in high carbon ferrochrome slag to obtain chromium and iron in the form of saleable metal

C.N. Harman

Adjustment of high carbon ferrochrome composition in DC furnaces

O. Privalov, Ye. Abdulbekov, Zh. Nurmukhanbetov, M. Kospanov, Zh. Mussabekov

Properties of chromite ores from Ferbasa and their effect on Cr-losses to slag during HCFeCr production at Ferbasa

E. Ringdalen, M. Rocha, J. R. Neto, T. Malvik

Manganese Alloys Production and Operation

The thermal diffusivity of raw materials for ferromanganese production

M. Ksiazek, T. Manik, M. Tangstad, E. Ringdalen

Melting and reduction of manganese sinter and pellets

T. Brynjulfson, M. Tangstad

Operational improvement of a submerged arc furnace in Kashima works (KF-1)

H. Takahashi, K. Ichihara, T. Homma

Extraction of manganese from the slag of silicothermal reduction of metallic manganese

V. Ya. Dashevskiy, A.A. Aleksandrov, A.G. Kanevskiy, L.I. Leontiev

Improved safety for manganese alloy smelting

P.A. Eidem, K.A. Egeland, D. Baumann

Purity requirements for Mn-alloys for producing high manganese TRIP and TWIP steels

J. Safarian, I. Kolbeinsen

Agglomeration of charge in ferromanganese submerged arc furnaces

D. Slizovskiy, M. Tangstad

Study of SiMn production in pilot scale experiments - comparing Carajas sinter and Assmang ore

E. Ringdalen, M. Tangstad

Manganese ore and alloys piloting tools at Eramet Research

G. Nussbaum, A. Amalric, A. Soller

Ferronickel Production and Operation

Electromagnetic level profile measurement system at VALE ONÇA PUMA ferronickel smelter improves safety and enhances process control decision making

N. Brogden, P. Jakobsson, P. Bloemer, A. Lyons, C. Doyle, R. Aquino, R. J. Dijkhuis, E. Floch

New method to produce FeNi nuggets from low grade ore by semi-molten reduction

X. Lu, E. Guo, P. Cheng, Q. Yuan, M. Liu
Refining of ferro-nickel

C. Redl, M. Pfennig, R. Kristl, S. Fritsch, H. Müller

Nickel pig iron production from lateritic nickel ores

H. Yildirim, H. Morcali, A. Turan, O. Yucel

Desulphurization of crude ferronickel, high sulfur content in ladle furnace

F. Hernández, M. Nejarda

Ferrosilicon Production and Operation

Engineered metallurgical silicon (EMS) - an alternative to mechanically milled silicon and a method to recycle wastes

A. Weber, L. Parous, V. de Oliveira

Phase chemistry of digout samples from a ferrosilicon furnace

J. Nell, C. Joubert

Production of SiO gas in the silicon process

S. Bao, M. Tangstad, K. Tang, E. Ringdalén

Condensate in the metallurgical silicon process – reaction mechanisms

J. Vangskåsen, M. Tangstad

Innovative electric smelter solutions of the SMS GROUP for the ferro-alloys and Si-metal industry

R. Degel, T. Germershausen, R. Nörthemann, M. Köneke

Other Ferro Alloys Production and Operation

New trends of production of FeSiAl – “Kazakhstanskyi”alloy

N. Nazarbaev

Prospects of production complex aluminum silicon alloy

V. Shkolnik, A. A. Zharmenov, M. Zh. Tolymbekov, S. O. Baisanov, A. F. Chekimbaev

Evaluation of physical and chemical properties of charge materials from the point of possibility of receiving the alloy of alusilicomanganese

Ye. Mukhambetgaliyev, S. Baysanov, A. Baysanov, N. Yugay, D. Zhiembaeva, V. Tolokonnikova

Boron in production of ferroalloy production

A. A. Akberdin, A. S. Kim

Innovations in ferro-alloys process technologies

T. Germershausen, J. Bader, J. Reichel, U. Gerike

Post Taphole Operations

Implementation of the technology of slag separation at Nikopol ferroalloy plant

ENGINEERING ASPECTS and CONCEPTS

Furnace Design and Equipment

Damage caused by the east Japan earthquake and recovery from this disaster at the Kashima works, Chuo Denki Kogyo CO., LTD
N. Ito, S. Tsukuda, A. Kato, S. Kurihara 355

The safe and efficient way of cooling: ILTEC – ionic liquid cooling technology
S. Konetschnik, A.S. Filzwieser, I. Filzwieser 369

Improved furnace cooling water leak detection system at Vale
B. Bussell, J. Janzen M., St. Amant, R. Miron, M. Emond, W. Braun, T. Gerritsen 377

Lining

Evaluation of HCFeMn and SiMn slag taphole performance using CFD and thermochemical property modeling for CaO-MnO-SiO₂-Al₂O₃-MgO slag
J. Muller, J.D. Steenkamp 385

Magnesia-carbon refractory lining for ferronickel converters - optimization and lining improvement at NEWCO FERRONIKELI (Cosovo)
T. Schemmel, L. Schade, P. Kouzoupis, F. Beqiri 393

Improved furnace lining performance at YIWANG ferroalloys
P. O'Shaughnessy, D. Wei, Kang Guoxhu, P. Sylven 401

Design and Control

Ferroalloy off-gas systems: from design to implementation and design verification process
P. Roberts, L. Els, S. Noakes, B. de Montard 407

Development of a camera-based Soderberg electrode slip measurement device
D. T. Jordan, C. J. Hockaday 417

Developments in advanced furnace control
S. Strydom, J. McDougall 427

Design of direct current furnace power 6.4 MW for silicon reducing. Electrodes and refractory work, control regimes and summary of manufacturing
S. Nekhamin 435

Electrodes and Control

Circulating currents in the delta connection, feasibility of skew tapping in the operation of submerged-arc furnaces
G. Saevarsdottir, P. Manolescu, T. Magnusson, K. Sigurjonsson 443

Minimizing thermal stress during shutdown of Soderberg electrodes
B. Larsen, H. Feldborg, S.A. Halvorsen 453
FUNDAMENTALS, THEORY

Reductants

Possible use of natural gas for silicon or ferrosilicon production
B. Monsen, L. Kolbeinsen, S. Prytz, V. Myrvågnes, K. Tang

Reducibility and electric resistance of carbonaceous materials within ferroalloy smelting processes
Zh. Nurmukhanbetov, O. Privalov, L. Prokopyev

Strength, micro-strength and microstructure of carbonaceous materials
X. Xing, G. Zhang, G. Ciezki, M. Dell’Amico, O. Ostrovski

Research of reducing ability of carbon reductants for ferroalloy production by dilatometric method
A. V. Pavlov, A. S. Kazakov, O. V. Chadaeva, Y. V. Shurigina

Production of special kinds of carbonaceous reducing agents for ferroalloy smelting

Effect of coke's texture on electrical behavior
A. Heikkilä, J. Pussinen, O. Mattila, T. Fabritius

Carbon reductant for silicon metal production
V. Kim, M. Tolymbekov, S. Kim, G. Ulyeva, S. Kudarinov

Chromium Fundamentals

Solid phase reduction of iron and chromium in the crystal lattice of ferrichrompikotit
K. T. Akhmetov, V. E. Roshchin

Evaluation of gaseous dynamic behavior of raw materials and charge for HC ferrochrome production
Zh. Nurmukhanbetov, O. Privalov, L. Prokopyev

The influence of CaCO₃ addition and clay binder selection on electricity efficiency and other operational aspects during pre-reduction of pelletised chromite
J. P. Beukes, B. W. Netzel, E. L. J. Kleynhans, P. G. van Zyl, N. F. Dawson

The thirteenth International Ferroalloys Congress
Efficient technologies in ferroalloy industry
June 9 – 13, 2013
Almaty, Kazakhstan

XV
TABLE OF CONTENTS

Volume II:

Manganese Fundamentals

Properties of Nchwaning and Gloria ore in the production of Mn ferroalloys
*M. Visser, H. Smith, E. Ringdalen, M. Tangstad* 553

Effect of CaF₂ on the reduction rate of MnO in CaO-SiO₂-MnO slag by SiMn melt
*Jung Ho Heo, Sung Dae Jeon, Sang Chul Shim, Joo Hyun Park* 567

Reducing dephosphorization of Si Mn alloy by CaO-CaF₂ slag and the stability of Ca₃P₂ in slags under atmospheric cooling conditions
*J. H. Shin, Joo Hyun Park* 575

Physicochemical properties of MnO-based slags for the production of manganese ferroalloys
*Joo Hyun Park* 585

Potassium distribution between liquid Mn-Fe-C alloys and MnO-SiO₂-CaO slags

Phase equilibrium thermodynamics in binary systems
*S. Baisanov* 605

Mechanism of carbothermic reduction of Mn oxide powder
*H. K. Shin, B. D. Lee, H. S. Lee, Young E. Lee* 621

Method of complex estimation of manganese raw materials
*A. V. Zhdanov, V. I. Zhuchkov, V. Ya. Dashevskiy* 631

Comparative study of features of partial solid phase metalling of manganese by thermal treatment of different types of manganiferous raw materials
*S. G. Grischenko* 637

Manganese alloys production: impact of chemical compositions of raw materials on the energy and materials balance
*M. Kalenga, P. Xiaowei, M. Tangstad* 647

Novel technology to produce ferromanganese alloy from steelmaking slag
*S.-J. Kim, H. Shibata, S.-Y. Kitamura, K. Yamaguchi* 655

Diagram of phase structure of the oxide system MnO-MgO-CaO-SiO₂-Al₂O₃
*M. Zh. Tolymbekov* 665

Corrosion of taphole carbon refractory by CaO-MnO-SiO₂-Al₂O₃-MgO slag from a SiMn production furnace
*J. D. Steenkamp, M. Tangstad, P. C. Pistorius, H. Molnäs and J. Muller* 669
Other Ferro Alloys Fundamentals

Extraction of iron from Bakal siderite by means of selective reduction in a complex oxide crystal lattice
*S.P. Salikhov, V.E. Roshchin, A.V. Roshchin*
677

Selective extraction of metals from complex ores
*V.E. Roshchin, A.V. Roshchin*
685

Characterization and reduction of high-silicon ironstone ore by CO gas
*S. Maroufi, G. Ciezki, M. Tangstad, S. Jahanshahi, O. Ostrovski*
695

Carbothermal reduction of high-silicon ironstone ore
*S. Maroufi, G. Ciezki, M. Tangstad, S. Jahanshahiand, O. Ostrovski*
705

The recovery of ferro-nickel from saprolite ores using reduction roasting
*J. Chen, E. Jak, P. C. Hayes*
713

High temperature phase equilibria in nickel-containing oxide and silicate systems relevant to ferro-nickel production
*J. Chen, V. Prostakova, P. C. Hayes, S. A. Decterov, E. Jak*
723

Boron and calcium refining of ferrosilicon by slag treatment
*L. K. Jakobsson, M. Tangstad*
733

Carbothermal reduction of silica in nitrogen and nitrogen -hydrogen mixture
*X. Wan, G. Zhang, O. Ostrovski, H. Aral*
739

Stepwise carbothermal reduction of bauxite ores
*C. H. Yeh, G. Zhang*
749

The main reasons to develop an improved casting process for silicon - new requirements for working environment, increased post taphole yield and product quality
*M. F. Møll, K. H. Berget, E. Myrhaug, M. Onsøien, H. Tveit*
759

Phase diagram structure of the system Cr-Fe-Al and Cr-Fe-Si
*Te. Shabanov, S. Baisanov, A. Chekimbaev, D. Zhaksylykov*
769

Theoretical and practical aspects of smelting new complex alloy - alumosilicomanganese with calcium
*A. Baisanov, A. Kopabaev, S. Baisanov, M. Tolymbekov, M. Dzhundibaev*
775

Self-propagating high-temperature synthesis of ferrosilico titanium
*K. R. Shaymardanov, I. M. Shatokhin, I. R. Manashev*
781

Optimization of physicochemical characteristics of chromium ferro-alloys
*V. I. Zhuchkov, N. A. Andreev, R. I. Gulyaeva*
787

A new process to produce 300 series stainless steel with electro-silicothermic method
*C. Peixian, C. Shaojun, W. Haijuan*
791
Modeling and Simulation

Mathematical model for fast computation of erosion profile in submerged arc furnace with freeze lining
*D. Hu, S. Chu*  
799

Process optimization model for FeMn and SiMn production
*E. Jipnang, P. Monheim, H. Oterdoom*  
810

Computational modelling of submerged-arc furnace burden behaviour
*Q.G. Reynolds, K. Bisaka*  
881

Evaporation of silicon as the basis for its sublimation purification
*V.P. Malyshev, N.S. Bekturganov, A.M. Turdukozhayeva, M.Zh. Tolymbekov, S.V. Kim*  
833

Water model study on mixing time in shaking ladle
*N. Shanqiang, C. Shaojun, Zh. Jun, L. Zhongsi*  
847

Pre-reduction of ilmenite with natural gas – model development and use
*S. Lobo, L. Kolbeinsen, S. Seim*  
857

Numerical model of two-phase flow in Creusot-Loire Uddeholm (CLU) converter
*T. Nyashanu, G. Akdogan, R.H. Eric, P. Taskinen*  
869

Online gas characterization by advanced spectrometry
*T.A. Aarhaug, A. Ferber, O. Kjos, B. Wittgens*  
883

Andalusite as slag conditioner in ferrochrome production: A case study in techno-economic modelling
*M.W. Erwee*  
893

ENERGY and ENVIRONMENT

Energy

Process Modelling and testing methods for evaluating ferroalloy furnace off-gas waste energy
*L. Eis, N. Andrew, S. Noakes*  
899

Ferroalloy off-gas system waste energy recovery: options and applications
*L. Eis, N. Andrew, T. Johannes, S. Noakes, J. Wingard*  
909

Energy mapping of industrial ferroalloy plants
*Y. Ladam, M. Tangstad, B. Ravary*  
919

Opportunities to reduce carbon foot print in HCFeCr production process in a submerged arc furnace
*L. Samaradivakera, G. P. Sahu*  
925

Ecoplants technologies – ecologic and economic solutions for the ferroalloy industry
*C. Fröhling, R. Degel, M. Babel*  
937
Environment

Fume characterization in the ferroalloy industry
I. Kero, M. Naess, G. Tranell

Experimental study of rate of silica fume formation from active oxidation of liquid silicon
M. K. Naess, N. Smith, G. Tranell, J. E. Olsen

Analysis of a ferromanganese secondary fume extraction system to improve design methodologies
L. Els, P. Cowx, R. Nordhagen, G. Kornelius, N. Andrew, P. Smith, S. Rencken

China's environmental targets for sustainable growth and the technological challenges for the ferroalloys industry
M. Louhi, P. Tang

Design of secondary fume capturing hood for casting hall of a SiMn production plant
M. Kadkhodabeigi, D. Haaland

Development of a CFD Model for improvement of an interior environment in metallurgical industries: modeling
B. Panijwani, H. Midtidal, B. Ravary, M. Kadkodabeigi, R. Nordhagen

Challenges in rendering CO-rich gas from submerged arc furnaces sufficiently clean for CO-generation application
J. Vehviläinen

Guidelines for sizing baghouse filters used for ferroalloy and silicon metal furnace applications
F. D. Fereday, L. Raath, B. de Montard

Progress in recycling sludge from off-gas cleaning of manganese alloy furnaces
B. Ravary, L. Hunsbedt, O. Kristensen

NOx-emissions from the silicon process comparing wet and dry raw materials pilot scale experiment
L. Solheim, N. E. Kamfjord

Hot gas cleaning of furnace off-gases
P. J. Jonker

Recycling

The recovery of manganese and generation of a valuable residue from ferromanganese slags by a hydrometallurgical route
D. R. Groot, D. M. Kazadi, H. Pöllmann, J. PR de Villiers, T. Redtmann, J. Steenkamp

Metallurgical silicon from high purity sand - critical issues and potential development
L. Parous, V.D. de Oliveira

The thirteenth International Ferroalloys Congress
Efficient technologies in ferroalloy industry
June 9 – 13, 2013
Almaty, Kazakhstan
Wastes of the ferroalloy production are raw materials for the chemical branch of industry
S.M. Isabaev, Kh.M. Kuzgibekova, E.V. Zhinova, T.A. Zikanova

COMMERCIAL ASPECTS

Markets

Establishment of innovative production and renovation of in-progress production as basis for strategic positioning of TNC KAZCHROME JSC on global chromium alloys market (PLENARY)
V. Til, O. Privalov, M. Kospanov, A. Razin, N. Nurgali, Zh. Musabekov

Applications and Uses

On the role of ferroalloys in steelmaking (PLENARY)
L. Holappa, S. Louhenkilpi
